Fiery Printing System 13
for the UTAX 5505ci, 4505ci, 3505ci, 3005ci

Choose a Versatile Printing System for Your Business Needs

The Fiery® Printing Systems for the UTAX line up cater to busy office work-group environments that need an easy-to-use, secure solution with high colour quality and outstanding productivity.

Maximize Productivity

The Fiery System 10e integrated server processes jobs up to 20 percent faster than its predecessors, and increases the printing speed of Microsoft® Office and Adobe® documents by providing the most efficient path for image and graphic-rich files.

Achieve Accurate, Consistent Colour

Fiery systems help you achieve precise colour with integrated tools that can be used by employees at all skill levels.

- Fiery ColorWise® colour management technology gives you great colour and image quality right out of the box.

- Fiery Spot-On™ offers a complete and easy-to-use toolset to print the best PANTONE® and custom spot colours.

- New calibration tools include job-based calibration and calibration status alerts for maintaining colour consistency.

Use an Easy and Friendly Office Solution

Fiery VUE is a "visual print application" that allows you to produce professional-looking finished print materials, such as booklets, quickly, easily and cost-effectively in-house. The interactive desktop application comes with a user-friendly 3D interface that visually guides you through the document creation process with intuitive layout and finishing tools.

Integrate with Your Corporate Environment

Fiery Printing Systems support a wide range of corporate network environments with data and network security protection.

- Manage the security of your data effectively with Secure Erase, user authentication and encryption.

- Administrators can set general authentication, disable network ports and services, set IP filtering and support anti-virus software.

- Offer multiple ways to securely print on the go — enabling users to print from mobile devices, in the office or at a remote location.

Scale Your Servers as Your Business Needs Grow

Your integrated Fiery servers come with optional features to expand functionality:

- The Fiery Productivity Package offers a host of graphic arts and workflow optimisation features including Fiery Image Enhance Visual Editor, an interactive tool for adjusting all images in a job individually without opening and editing the file in the originating application.

- Fiery Hot Folders and Virtual Printers automate the job-submission process, reducing errors and automating repetitive tasks with a simple "drag-and-drop" operation.

- Fiery Impose offers visual imposition and document preparation capabilities to ensure accurate, finished documents on time.

- Fiery JobMaster™ provides advanced PDF-based job preparation functions including visual tab insertion and design, media assignment, page numbering, finishing, scanning and powerful late-stage editing features.

UTAX 5505ci, 4505ci, 3505ci, 3005ci

Fiery Printing System 13

Fiery-Driven® Engines
- **Printing System 13**:
  UTAX 5505ci, 4505ci, 3505ci, 3005ci

Hardware & Platform
- Intel® Pentium® E5300 Processor
- 2.6 GHz processor
- 1 GB RAM
- 160 GB HDD
- Linux operating system

Fiery Utilities
- Fiery Driver 4.4
- Fiery Command WorkStation® 5.4
- Fiery WebTools™
- Backup and Restore

Page Description Languages
